

# SMALL BUSINESS AND NONPROFIT ENERGY SAVINGS DON'T MISS OUT!

STEP 1

## Learn How to Increase Your Building and Equipment Energy Efficiency Year-round with a FREE Assessment

Sign up for a FREE assessment from  
Minnesota Chamber's Energy Smart at  
[mnchamber.com/energy-smart](http://mnchamber.com/energy-smart).

STEP 2

## Save Money and Energy with Rebates and Programs

Discover utility rebates and programs  
available for replacing lighting, HVAC  
equipment, food service equipment, and  
more. Visit [xcelenergy.com/business](http://xcelenergy.com/business) or  
[dakotaelectric.com/business](http://dakotaelectric.com/business).

STEP 3

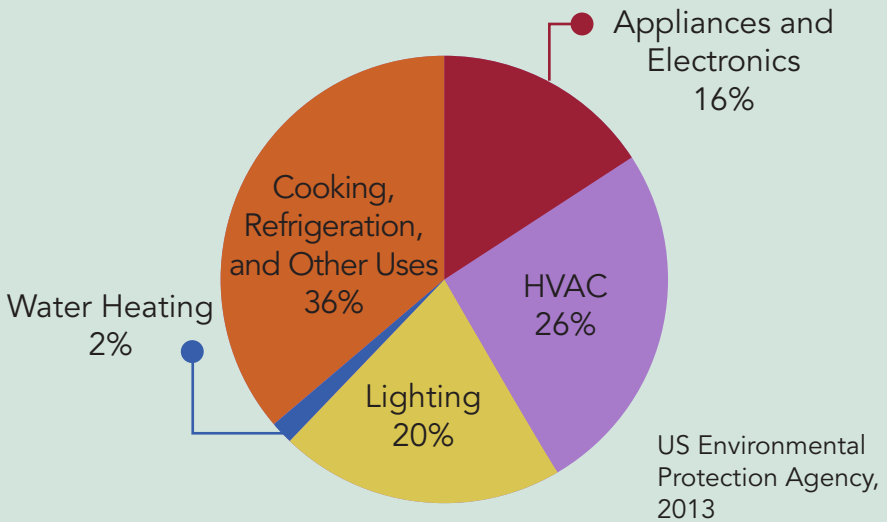

## Explore Financing Options

Low-interest loan programs are available to  
help fund energy efficiency and renewable  
energy projects. Visit [ighmn.gov/energy](http://ighmn.gov/energy)  
for more information.

An Xcel Energy Community Collaboration

# Commercial Energy Use

## Take the First Steps to Increasing Energy Efficiency:

- **Lighting:** Make the switch to LED bulbs to drive long-term energy and cost savings to your bottom line.
- **Appliances:** Choose a high-efficiency model when it's time for replacement of a boiler, furnace, water heater and more. Rebates may be available from your electric utility.
- **Automatic Shut Offs:** Automate your stock room lights and HVAC system to shut off when they're not being used with occupancy sensors and updated controls.
