

Pavement Management Initiative Communications

Current Strategies & Opportunities for Growth

*Amy Looze, Communications Manager
Presentation to Pavement Management Citizen Taskforce
January 27, 2022*

Starting Point for Communications in 2021

There was sense of urgency among residents for the city to address pavement repair and infrastructure needs.

Pavement communication needed to convey the following themes to residents and stakeholders:

- 1. Commitment** *to respond to the issue. We heard you, residents, and we are prioritizing pavement repair.*
- 2. Trust.** *Your time and money are valuable and will be used wisely. You will have opportunities for feedback and engagement.*
- 3. Transparency.** *We will share accurate information about project plans and costs in a timely manner and make the info easy to navigate.*
- 4. Follow-through.** *Communicate action steps and results.*

Branding Pavement Management & Rehabilitation Efforts

First step in communicating a commitment to pavement repair was branding the initiative:

- Logo provided easier recognition of pavement-related communications; it appears alongside city logo
- Formalizes our efforts; communicates that this is a city priority

Promoting Pavement Management Initiative through Existing Channels:

- Required Notification Letters
- City Resident Quarterly Newsletter (Insights)
- City Website
- City Email Subscriber Lists
- City Social Media Profiles

Required Notifications

- Notification Letters to Residents about Upcoming Projects
- City Council Presentations
- Neighborhood Meetings
- Improvement Hearings
- Assessment Hearings

Notification Letters -Rebranded and formatted for a quicker read:

October 14, 2020

RE: Delaney Circle and Delaney Court Improvements
City of Inver Grove Heights
Project No. 2020-09D

Dear Resident/Property Owner:

This letter is to inform you that the City of Inver Grove Heights has begun planning for a 2021 street improvement project in your neighborhood. As part of the City's Capital Improvements Plan (CIP) and Pavement Management Program, the City Council authorized the preparation of a feasibility report by Kimley-Horn and Associates, Inc. at the September 28, 2020 regular meeting in response to a petition received from the neighborhood. The feasibility report will investigate the street and drainage improvements in the Delaney Circle and Delaney Court residential neighborhood. A project map is enclosed. A neighborhood meeting will be held for resident input this fall. An invite with meeting details will be mailed to residents once scheduled.

You can also expect to see private utility companies marking facilities and survey crews in the area collecting topographic data over the next few weeks. The surveyors have been instructed to measure landscaping features, ground shots, trees up to 10 feet beyond the right-of-way, and other features within the City right-of-way. If you have an irrigation system or invisible fence, please have it marked (including irrigation head locations near or in the street right-of-way) so the surveyors can measure the location.

An additional letter and questionnaire are enclosed regarding private drainage systems, irrigation systems, and drainage issues in the area. Any information you can share at this time will allow the City the opportunity to investigate any potential issues in the project area during the planning and design process. Please either email a scan of the completed questionnaire to Luke Moren, Project Manager with Kimley-Horn and Associates at Luke.Moren@kimley-horn.com or mail the questionnaire via the enclosed return envelope by October 30, 2020.

A tentative project schedule is provided below.

Resident Questionnaire
Feasibility Report Development
Neighborhood Meeting and Council Consideration
Final Design
Bidding
Neighborhood Meeting and Assessment Hearing
Begin Construction

October 2020
October/November 2020
November/December 2020
December 2020 - February 2021
March/April 2021
May 2021
June 2021

If you have questions regarding this letter please contact me at (651) 450-2489 or Luke Moren, Project Manager with Kimley-Horn and Associates, at (651) 643-0489.

Sincerely,

October 14, 2020

RE: **Delaney Circle and Delaney Court Improvements**
City of Inver Grove Heights
Project No. 2020-09D

Dear IGH Resident,

Good news! This letter is to inform you that the City of Inver Grove Heights is planning a 2021 street improvement project in your neighborhood. **Here's what you need to know:**

- As part of the city's **Street Rehabilitation Initiative**, IGH City Council green-lighted a feasibility report by on September 28, 2020 in response to a petition received from the neighborhood.
- A map of the project area is enclosed, or one can be found on our website at www.ighmngov/pavement.
- Expect an invite from us soon for a **neighborhood meeting** to discuss the project.

Tentative Delaney Project Schedule:

Resident Questionnaire
Feasibility Report Development
Neighborhood Meeting and Council Consideration
Final Design
Bidding
Neighborhood Meeting and Assessment Hearing
Begin Construction

October 2020
October/November 2020
November/December 2020
December 2020 - February 2021
March/April 2021
May 2021
June 2021

You can also **expect to see private utility companies and survey crews** in the area over the next few weeks. The surveyors will measure landscaping features, as well as trees and other features up to 10 feet beyond the right-of-way. If you have an irrigation system or invisible fence, please have it marked (including irrigation head locations near or in the street right-of-way) so the surveyors can note their location.

We want to hear from you! An additional letter and questionnaire are enclosed regarding the project area. Any information you share will help the city identify potential issues in the project area during the planning and design process. Please either email a scan of the completed questionnaire to Luke Moren, Project Manager with Kimley-Horn and Associates at Luke.Moren@kimley-horn.com or mail the questionnaire via the enclosed return envelope by October 30, 2020.

If you have questions regarding this letter, please contact me at (651) 450-2489 or Luke Moren, Project Manager with Kimley-Horn and Associates, at (651) 643-0489.

Sincerely,

Bolding important project items and adding headings

Fall 2021

Public Works

Council Green-Lights Major Initiative to Rehabilitate Ten Miles of IGH Streets

At a City Council Work Session on September 7, City Council gave direction to city staff to undertake major pavement rehabilitation projects across the city in 2022 and beyond. Specifically, staff will begin looking at more than ten miles of neighborhood streets for pavement replacement in 2022, which is roughly five times the number of miles in previous years. This ambitious effort will begin with more detailed studies of road conditions and needs. One of the first steps in the process will be to hold neighborhood meetings with the property owners that might be affected by the pavement rehab projects. If you are in one of these neighborhoods, you can expect to hear from the city this fall when you will be invited to share input on potential projects.

Once areas are studied, city staff will report back to Council and, if the project is feasible, Council will hold a public hearing to hear resident concerns and decide if a neighborhood project should proceed. Projects that go forward will involve pavement removal and replacement, repairs to utility systems in the area, and other related work. Assessments to property owners are part of the funding solution for this pavement initiative, and those details will also be worked out as part of the study process. Projects on this list that do end up going

forward would likely be substantially completed in summer and fall of 2022. If you don't see your neighborhood included for 2022, check back, as city leadership is making a long-term commitment to road improvements. An ambitious project pace will continue every year until we improve city roads to the condition we all want them in.

City Council also gave the green light to the Pavement Management Citizens Taskforce (CTF), which starts its work this fall. CTF is tasked with examining the city's Pavement Management Program and providing recommendations to the City Council on how to improve it. The CTF will look at how we select project areas, how we pay for improvements, the methods we use to rehabilitate our streets, as well as the overall goal of our Pavement Management Program. The CTF will report back to Council next spring, and its recommendations will guide pavement management efforts over the next decade.

With a big rehabilitation effort next year and the CTF helping set a roadmap for how we go forward, city leadership aims to improve roadway conditions across the city, and then keep them there!

Calling all Pavement Lovers Join the Citizen Taskforce on Pavement Management!

Inver Grove Heights has about 150 miles of streets, and keeping them in top condition is a major challenge. Over the last 10 years, many miles of roads have been rebuilt, but even more are showing their age. Getting our roads into the condition in which we all want them is proving to be an expensive and challenging goal. At the June 14, 2021 City Council meeting, our Council took action to undertake a new initiative to examine the city's pavement management program from top to bottom.

As part of this process, Council established a new Citizen Taskforce on Pavement Management. This Taskforce will look at the current state of our roads, recommend target goals for pavement condition, explore all possible funding approaches, compare our assessment policies to those of other cities, recommend funding levels and strategies, and also investigate effective strategies for repairing streets. With the assistance of city staff, the Taskforce will prepare and present a report to Council with recommendations.

We need you to get involved!
If you are interested in helping the city in this important effort, we encourage you to apply to be a member of the Pavement Management Taskforce. It will meet approximately 10 times over the fall and winter, and complete its study in spring 2022. The city will be accepting applications for the Taskforce until July 30. Visit www.ighmn.gov/pavementtaskforce to apply.

Winter 2022

Public Works

Pavement Management Citizen Taskforce Update

In September 2021, the City Council created a Citizen Taskforce (CTF) on Pavement Management, which is made up of 15 IGH residents, two councilmembers and city staff. So far, the team has been busy!

To begin, the CTF took a crash-course on the city's current Pavement Management Program (PMP). It looked at all city infrastructure and when that infrastructure is expected to wear out. Second, the team got an overview of the city's Pavement Condition Index (PCI), which rates the condition of IGH streets, then reviewed the causes of pavement deterioration, and learned about types and costs of pavement rehabilitation and replacement strategies.

In December, the taskforce examined and discussed the city's financing strategies related to pavement management. Topics included the overall city budget, and the means by which pavement management can be funded by the city, including:

- Dedicated property tax revenues available for the PMP

- Dedicated franchise fees, which the city collects from gas and electric utilities
- "Host community" funds provided by the waste management companies that operate landfills in the city
- Assessments paid by resident homeowners and businesses

The CTF will analyze options and begin gathering recommendations, which will be presented to the City Council in late spring 2022. The goal is to provide feedback on whether current funding programs are adequate to address long-term pavement needs in IGH, and to ensure that any approach taken is fair to residents and businesses.

There's more to come! Please visit www.ighmn.gov/pavement for updates on the city's Pavement Management Initiative.

Special thanks to IGH resident and Citizen Taskforce Chairperson Kelly Kaysar for her contribution to this article!

Also included educational articles proceeding the launch of the initiative:

- What is Core Drilling?
- Spotlight/Round-up on Public Works Activities

Created a Short Website URL

- Fast, saves time
- Easy to remember
- One location for pavement info

Transparency and engagement:

--Details on how to get involved and find out more

--Department email address to message if your neighborhood streets need of repair; request additions to project list

Paving the Way to Better Roads in IGH

If you don't see your neighborhood on our proposed project map, don't panic! IGH has 50 miles of roadway in need of repair, and we can't fix them all in one year. We will be actively adding streets to our project list as the IGH pavement rehabilitation initiative progresses.

If the streets in your neighborhood are overdue for repair, we would like to hear from you! Here are steps that you can take:

1. Email our Public Works department at pavement@ighmn.gov with your request.
2. Check back on our website for news about public meetings related to proposed street projects: www.ighmn.gov/pavementtaskforce.
3. Attend City Council meetings to stay up-to-date on IGH pavement rehabilitation initiatives and other city news. For a meeting calendar, visit our homepage at www.ighmn.gov. For meeting agendas, visit www.ighmn.gov/agendacenter.

Pavement Initiative and Taskforce Update Last Week - Links to more info

City of Inver Grove Heights, Minnesota

Published by Hootsuite · January 19 at 5:18 PM ·

For all the pavement lovers out there...our last Insights newsletter provided an update on the IGH Pavement Management Initiative, which includes plans to repair more than 10 miles of IGH streets in 2022. That's roughly five times the number of miles repaired in a previous year! In case you missed it, here is a recap of the update and info on how to learn more:

Last fall, City Council created the Pavement Management Citizen Taskforce, which is currently collaborating with councilmembers, city staff and consultants to gather more information on IGH infrastructure needs and how best to fund future projects. It will provide its recommendations to City Council this spring.

If you want to stay up-to-date on taskforce findings and upcoming IGH street projects, you can:

--Visit <https://www.ighmn.gov/.../Pavement-Rehabilitation-Initiative> to find project meeting dates, sign up for email notifications and read Pavement Management Taskforce presentations.

--View this interactive map on our website for project locations and dates: <https://igh.maps.arcgis.com/apps/MapSeries/index.html...>

*If you don't see your neighborhood on the map, but feel it should be considered for a future project, the map outlines the steps to take to contact city staff about your neighborhood.

--You can read Pavement Management updates in the Insights newsletter at www.ighmn.gov/newsletter, follow the City of IGH on social media, and watch upcoming City Council meetings to learn more. Visit www.ighmn.gov/agendacenter to see what is included on each City Council and Citizen Taskforce meeting agenda.

--And you can contact the city with questions. We ❤️ pavement, too!

This post so far: 315 engagements; 151 link clicks

Pavement Management Initiative Communications Priorities for 2022 include:

- This spring: communicating out to residents the taskforce findings and recommendations made to City Council
- Summer/fall: pavement project photos before, during, after. Share on social media and website, so that more than just one neighborhood sees results.
- End of year: proposed 2023 and 2024 project lists
- Ongoing: quarterly updates on pavement initiatives in Insights newsletter

Opportunities for Future Communications

- Education on pros & cons of different funding strategies: taxes, assessments, franchise fees, host community fund
- Education around assessment percentages
- FAQ and info on street PCI index; street “ranking” by condition and how that’s determined
- Education on core drilling and other geo-tech studies that determine street condition
- Education around sealcoating
- “Executive summary” of PCI data and feasibility reports; layman’s terms
- Education around methodology for choosing repair projects; why we choose the streets we choose
- Mill & overlay versus reconstruction—differences, pros and cons
- Assessment percentages compared to neighboring cities
- Utility billing mailer-buck slip inserted with each bill—with PMI info; a cost-effective way to reach residents by mail
- Introduce more members of our streets division to residents
- Earlier project notification letters
